## Lesson 3: Grammar and Foundational Skills

---

En inglés, el \_\_\_\_\_ de los verbos \_\_\_\_\_ se usa para \_\_\_\_\_ que sucedieron en el \_\_\_\_\_ o para describir cómo eran las cosas antes. Se forman al agregar -\_\_ al \_\_\_\_\_ de la palabra base. Por ejemplo, \_\_\_\_\_.

Pero si el verbo termina en \_\_\_\_\_ se le agrega solo la -\_\_. Por ejemplo, \_\_\_\_\_. Cuando el \_\_\_\_\_ termina en -\_\_ se cambia la **y** por -\_\_ y se agrega -\_\_. Por ejemplo, \_\_\_\_\_. A veces se \_\_\_\_\_ la \_\_\_\_\_ y luego se agrega -\_\_. Por ejemplo, \_\_\_\_\_.

### Tiempo pasado de verbos regulares en inglés

La mayoría de los verbos regulares en inglés agregan la terminación *-ed* al final del verbo en infinitivo.

Por ejemplo: *to play – played*

1. Los verbos que terminan en *-e*, simplemente añaden *-d*.
  - Por ejemplo, *change – changed*.
2. Los verbos que terminan en consonante + *-y*, cambian la *y* a *i* y añaden *-ed*.
  - Por ejemplo, *cry – cried*.
3. Los verbos cortos que terminan en consonante, duplican la última consonante y añaden *-ed*.
  - Por ejemplo, *stop – stopped*.

## Unit 9

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Read the text and respond.

### From Ocean to Sky: How Animals Changed Over Time

A long time ago, the first animals lived in the oceans. Over time, many species changed so they could live on land. For millions of years, as environments changed, animal species slowly changed and they gradually adapted to new environments. These changes created many of the animals we see today.

Whales and hippos share the same ancestor, but over millions of years they became two different species. Now, whales live in the ocean, while hippos live in water during the day, and come onto land at night to eat grass. Birds also evolved from small meat-eating dinosaurs; over time their bodies became lighter, and they developed feathers that helped them fly and survive.

#### 1. Multiple Choice

Which sentence best summarizes the text? (Circle the letter for the correct answer.)

- A. Animals changed quickly when they moved from the ocean to the land.
- B. Over millions of years, animals slowly changed as environments changed, creating many species today.
- C. Whales and hippos are the same species because they share an ancestor.
- D. Birds evolved from whales, and hippos evolved from dinosaurs.

#### 2. Written Response

Adaptations help animals survive in harsh places. In your writing:

- Animals changed quickly when they moved from the ocean to the land.
- Use evidence from the text.
- Make sure what you have written supports the main idea.
